Conditions of sale

Price per copy (excluding postage): Kenya shillings 200/= for Kenya
US\$ 20 for other countries

Subscriptions per year (excluding postage): Kenya shillings 2200/= for Kenya
US \$ 150 for other countries.

Subscriptions per year (including postage): Kenya shillings 3000/= for Kenya
US \$ 220 for other countries.

NOTICES

PUBLICATION FEES FOR MARKS

	Foreign	Local
For the first.....	US\$ 60	Ksh. 3,000/=
For each subsequent.....	US\$ 50	Ksh. 2,500/=

The above-mentioned charges apply for all other matters required to be published under the Trade Marks Act

The Industrial Property Journal

INID CODES

INID is an acronym for ‘**I**nternationally agreed **N**umbers for the **I**dentification of (bibliographic) **D**ata’. The codes are used on the first page of industrial property documents and in gazettes to identify the bibliographic data without knowledge of the language used and the industrial property laws applied. The following INID codes are used in this Journal:

Standard ST.9 and ST.80 for Patents and utility Models and Industrial Designs

- (11) Number of the document
- (12) Designation of the kind of document
- (15) Correction information
- (19) WIPO standard ST.3 code of the office or organization publishing the document
- (21) Application Number
- (22) Date of filing of application
- (30) Priority data
- (31) Priority Number(s).
- (32) Priority Date(s).
- (33) Priority Country(s).
- (41) Publication date of unexamined application
- (42) Publication date of examined application
- (45) Publication date of registered right/Date of registration
- (51) Internationalification.
- (54) Title of the Invention.
- (56) Cited documents
- (57) Abstract
- (71) Name(s) of(s).
- (72) Name(s) of Inventor(s)
- (73) Proprietor
- (74) Name and address of Agent or.
- (85) Date of entry into national phase for PCT applications
- (87) PCT Publication data

Standard ST. 60 for Marks

- 111 Registration number
- 180 Expiry Date
- 210 Application number
- 220 Filing date of application
- 300 Data relating to under the Paris convention
- 442 Date of advertisement
- 511 Internationalification and/or list of goods and services
- 526 Disclaimer
- 540 Reproduction of the Mark
- 566 Translation of the mark or words contained in the mark
- 15 Amendment/Correction information
- 591 Information concerning colours claimed
- 730 Name and address of the/proprietor
- 740 Name and address of the agent or
- 791 Name and address of Licensee/registered user

(54): A METHOD OF HARDENING OF TISSUE CULTURE RAISED TEA PLANTS (51) Int.Cl.:

(57): This invention relates to a method of hardening of tissue raised tea plants using antagonistic bacteria. The process comprises in the steps of preparing a suspension of of antagonistic microorganism (bacteria) having inhibition properties to isolated pathogenic fungi. The bacteria suspension so obtained is introduced into sterile soil. The tissue culture raised plants placed into said sterile soil having said organism. The microorganism used are Bacillus subtilis or Pseudomonas corrugata.

(54): USE OF ISOPTERA AND EPHEMEROPTERA IN FORMULATION OF DOUGH AND BATTER PRODUCTS SAUSAGES AND MEAT LOOFS

(57): This is innovation in the area of Entomophagy. The invention pertains to production of baked crackers and muffins; sausages and meat loafs from reproductive termites (isoptera) and mayflies (ephemeroptea) as key ingredients in the food production. The key ingredients are made by sun-drying termites and mayflies, which are then grinded into flour for use. In baking, the ingredients are mixed with wheat flour, other baking ingredients and raising agents to form dough and batter, which are then baked accordingly in conventional oven to make crackers and muffins. The sausages are made from the mayfly ingredient, food fillers, food additives and boiled or fried as necessary. The mayfly ingredient is then mixed with food fillers, food additives, eggs, gelatin and shortening placed into a loaf mold, then cooked under pressure to make the meat loaf. Food additives used include sodium chloride, sodium nitrite, sodium tri-phosphate (STPP), dextrose, and monosodium glutamate (MSG).

(11): KE 305 (45): 27/02/2009 (21): 2008/ 000703 (22):28/08/2006 (30):1416/05 30/08/2005 CH

 (51) Int.Cl.A: 0 1H 4/00, 5/02
 (57): Method for the production of young plants and/or micro-parent stock of 5 herbaceous ornamentals. Method for the production of young plants and/or of micro-parent stock of herbaceous ornamentals, which comprises an in vitro culture phase during which explants obtain from parent stock of species to be propagated, or derivatives of these explants, are subjected to micropropagation which is carried out under suitable conditions and on suitable culture media, in order to produce microplantlets which, when subjected to an in vivo culture phase, are intended to develop into plants or into micro-parent stock, characterized in that, to carry out said micropropagation: the explants are, under axenic conditions,

in the dark and for a suitable period of time, placed on a proliferation medium which is composed to suit each plant species to be propagated, so as to induce the formation of white filaments which comprise axillary buds, each of the white filaments is divided into a plurality of pieces, each of 20 which comprises an axillary bud, and said pieces are, in the light, under axenic conditions and for a suitable period of time, placed into a rooting medium, which allows each axillary bud to produce a micro-plantlet which has roots.

(57) The present invention relates to novel method for micropropagation of tea plants from explants obtained from completely folded, half opened or fully expanded leaves via callus phase , by culturing the explants on different media.

.....
(21): 2006/ 000525 (22): 25/10/2006 (51) Int.Cl. (54): USE OF ISOPTERA AND EPHIMEROPTERA IN FORMULATION OF DOUGH AND BATTER PRODUCTS SAUSAGES AND MEAT LOOFS (71): MONICA A. AYIEKO , P.O. BOX 19365, KISUMU., Kenya (72): MONICA A. AYIEKO (74): ,

(57) This is innovation in the area of Entomophagy. The invention pertains to production of baked crackers and muffins; sausages and meat loafs from reproductive termites (isoptera) and mayflies (ephimeroptea) as key ingredients in the food production. The key ingredients are made by sun-drying termites and mayflies, which are then grinded into flour for use. In baking, the ingredients are mixed with wheat flour, other baking ingredients and raising agents to form dough and batter, which are then baked accordingly in conventional oven to make crackers and muffins. The sausages are made from the mayfly ingredient, food fillers, food additives and boiled or fried as necessary. The mayfly ingredient is then mixed with food fillers, food additives, eggs, gelatin and shortening placed into a loaf mold, then cooked under pressure to make the meat loaf. Food additives used include sodium chloride, sodium nitrite, sodium tri-phosphate (STPP), dextrose, and monosodium glutamate (MSG).

(21): 2007/ 000565 (22): 26/02/2007 (51) Int.Cl. (54): DISTILLED HERBAL MEDICINAL EXTRACT (71): OYOO JERIM ONYANGO , P.O. BOX 80225-80100, MOMBASA.(72): OYOO JERIM ONYANGO

(57) The innovator has achieved a technological breakthrough in processing herbal medicinal products and preservation exclusively by physical means (without additives or chemical preservatives). The medicines are used for treatment of various ailments and also as food supplement, on human beings and animals.

The technology involves collection and mixing parts of various medical plants for treatment of particular ailments. The mixture is stuffed in a large pot which is filled with water.

The next step involves putting another pot with hollow bottom on top of the big pot with medical plants mixture. Inside the pot with a hollow bottom is fitted another small pot where the captured vapour from the bottom of the basin at top settles.

The connections between the large pot, the hollow bottom pot and the basin on top are sealed to ensure that pressure is maintained during distillation to enable efficient filtration of herbs medicinal content.

The pot is put on fire and the basin on top filled with water. The water in basin is changed six to eight times depending on the basin size whenever it gets warm.

At the end of the operation the fire is put off and the last warm water replaced with cold water for the pressure to go down and allowed to cool for about 10 to 15 minutes. After cooling the basin is removed and the container with filtered distilled medicinal content is also removed and the content transferred to another clean stainless steel container for further cooling.

The final product is put through further filtration and testing before packing and labelling. The final product is stored in cool dry place ready for dispatch to the market.

(21): 2007/ 000109 (22): 27/09/2007 (30) Priority: (51) Int.Cl. (54): TOILET SEAT DEVICE (71): GITAU VASLIAH WANJIRU (MRS.), P.O. BOX 22403-00400. NAIROBI.
(57) In summary, the invention step is a comfort concept that consists of the introduction of a toilet seat device to the pit latrine system. The device consists of three components which are the seat, the seat cover and the raised neck of the device.
The round toilet seat has a central opening fitted with a small side handle to allow for ease of lifting when using the toilet and for hygiene purposes. It is pivotally arranged to allow for movement between a raised and lowered position.
The seat cover is fitted with a small front handle to make it easier to shift positions. It is also arranged to be pivotally movable to either close the central opening on the toilet seat when the seat is in a lowered position or to open the same when the seat is to a raised position.
The "neck" is a hollow raised section and has straight sides and a wide base to enhance the stability of the device. The toilet seat is mounted onto this neck.
The toilet seat device can be viewed as the most effective way of providing comfort to pit latrine users while ensuring that safety and health requirements are met.

(72) MOSS Ronald B., (54): HIV IMMUNOGENIC COMPOSITIONS AND METHODS. (51) Int.Cl.A: 6 1K 39//21 (57): The invention provides immunogenic compositions which enhance B-chemokine levels in a mammal. The immunogenic compositions contain an HIV antigen, an isolated nucleic acid molecule containing an immunostimulatory sequence (ISS) and an adjuvant. The HIV antigen can be a whole-killed HIV virus devoid of outer envelope protein gp 120. Alternatively, the HIV antigen can be a whole-killed HIV virus, or a p24 antigen. Also provided are kits, the components of which, when combined, produce the immunogenic compositions of the invention. The invention also provides methods of making the immunogenic compositions, by combining an HIV antigen, an isolated nucleic acid molecule containing an immunostimulatory sequence (ISS) and an adjuvant. The invention further provides a method of immunizing a mammal, by enhancing B-chemokine production in the mammal by administering to the mammal an immunogenic composition containing an HIV antigen, an isolated nucleic acid molecule containing an immunostimulatory sequence (ISS) and an adjuvant. Also provided is a method of inhibiting AIDS, by enhancing B-chemokine production in the mammal by administering to the mammal an immunogenic composition containing an HIV antigen, an isolated nucleic acid molecule containing an immunostimulatory sequence (ISS) and an adjuvant.

(54): MULTIVALENT MENINGOCOCCAL POLYSACCHARIDE-PROTEIN CONJUGATE VACCINE. **(51)** Int.Cl.A: 61K 39/05, 39/095, 47/48 **(57):** The present invention describes a combined vaccine that offers broad protection against meningococcal disease caused by the pathogenic bacteria Neisseria meningitidis. The vaccine is comprised of four distinct polysaccharide-protein conjugates that are formulated as a single dose of vaccine. Purified capsular polysaccharides from Neisseria meningitidis serogroups A, C, W-135, and Y are chemically activated and selectively attached to a carrier protein by means of a covalent chemical bond, forming polysaccharide-protein conjugates capable of eliciting long-lasting immunity to a variety of N. meningitidis strains in children capable of eliciting long-lasting immunity to a variety of N. meningitidis strains in children.

(54): RECOVERY OF PLATINUM GROUP METALS. **(51)** Int.Cl.C: 22B 11//08, 3//00, 3//44 **(57):** A process of recovering platinum group metals (PGMs) from a pregnant solution or leachate containing PGM values and base metals, typically a cyanide solution or leachate. A non-selective precipitation of the PGM values and base metals to form an insoluble precipitate comprising the PGM values and base metals is followed by selective leaching of the precipitate. The selective leaching forms a leach solution containing the base metals and a residue containing the base metals and PGM values and a depleted residue. The base metals are recovered from leach solution and the PGM values are recovered from the residue or the leach solution, depending on the selective leaching. The non-selective precipitation of the PGM values and the base metals is carried out by controlled reduction of the pH of the pregnant solution or leachate to a pH of about 2.

2.0 Industrial Designs

2.1 Applications accepted for registration

NOTICE is given that any person who has grounds of opposition to the Registration of any of the Industrial designs advertised herein may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form IP 36 (in duplicate) together with a fee of Ksh.5, 000/= (local opponent) or US\$ 250 (foreign opponent).

The period of lodging the notice of opposition may be extended by the Managing Director as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Managing Director to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after a reasonable notice has been given in writing to the applicant to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

Representations and samples of the designs advertised herein can be seen at the Patent Registry, Kenya Industrial Property Institute, Weights and Measures premises, Popo Road, off Mombasa Road, Nairobi.

(21): 1999/ 000183 (22): 18/08/1999

(73): Rodentkil Cleaning Co. Ltd , P.O. Box 47696 Nairobi, Kenya (74): ,

(51) International Class (Loc (6)): 09-09 (54): DOME SHAPED SANITARY BIN

(21): 2004/ 000591 (22): 05/10/2004

(73): Safepak Limited, P.O. Box 39060 - 00100 NAIROBI., Kenya (74): Kaplan & Stratton Advocates, P.O. Box 40111-00100, Nairobi

(51) International Class (Loc (6)): 09-01 (54): CONTAINER

The novelty of the container lies in the reverse "S" feature, in pattern starting from the top of the bottle to the beginning of the label area, coming out positive in relation to the rest of the body and, the overall shape of the container

(21): 2007/ 000858 (22): 04/10/2007

(73): METSEC LIMITED, P.O. BOX 75963-00200, NAIROBI

(51) International Class (Loc (6)): 13-03 (54): WIRE STRAINER.

The novelty of the component lies in the set of two ribs starting from opposite directions mounted on a circular base which stands on a rectangular block curved on two opposite corners.

(21): 2008/ 000883 (22): 04/06/2008

(73): PREMIER FOOD INDUSTRIES LIMITED, P.O. BOX 41476-00100, NAIROBI.

(51) International Class (Loc (6)): (54): BOTTLE.

The novelty of the said bottle is its shape with its broad space for holding the bottle while pouring its unique shoulders and sliding angle near the base. It has a depression for fitting the label. As overall character, the bottle has an attractive and aesthetic eye approval being the unique feature of this design.

(21): 2009/ 000916 (22): 12/02/2009

(73): SAMEER AFRICA LIMITED , P.O. BOX 30429-00100, NAIROBI

(51) International Class (Loc (6)): 12-15 (54): PNEUMATIC TIRES.

THE FEATURES OF THE DESIGN FOR WHICH NOVELTY IS CLAIMED ARE THE SHAPE AND CONFIGURATION OF THE TREAD PATTERN DESIGN AS SHOWN IN THE REPRESENTATIONS.

(21): 2009/ 000923 (22): 11/02/2009

KBL

ECOMAGINATION

radiochemicals for scientific research use; reagents for scintillating proximity assays; high through put screening assays for drug development; reagents for high resolution laser fluorescence confocal microscopy; specialty chemicals for use in industry, science and research; gases and gas mixtures for industrial, research and scientific purposes; chemical preparations and substances for use in the manufacture of pharmaceutical products, diagnostic preparations and substances; chemical test reagents, saline solution and reagent-coated paper all for scientific and laboratory use; fissionable chemical elements for scientific research use; radioactive elements and isotopes for industrial, scientific and research purposes; radioactive sources and standards for use in radiographic techniques; radioactive sources for use in non-destructive testing, purification and sterilizing techniques; radionuclides for scientific research use; chemicals and chemical compositions for use in the treatment of water systems, wastewater treatment systems, cooling water systems, boiler water and steam generating systems, boiler condensate systems, fluid separation systems, water clarification and dewatering in aqueous systems; conditioning systems, gas cleaning systems, industrial process systems, fuels and fuel processing systems, hydrocarbon and gas processing systems, oil and gas processing and petrochemical systems, chemical gasoline additives and distillate fuel additives; performance additives for fuels used in turbine engines; bags of chemically-treated water-absorbing' granular materials for placement into fuel tanks; test kit consisting of reagents used for determining the presence of algae and active organic organisms in diesel fuel; bacteria cultures and nutrients for wastewater and sludge treatment; polymeric chemicals used to disperse particulate matter in steam generating equipment; chemicals and chemical compositions as antifoulants and demulsifiers in coke-making and by-product operations of iron and steel industries.), 5 (Pharmaceutical preparations for use in diagnosis; veterinary pharmaceutical preparations for use in diagnosis; pharmaceutical and veterinary substances for medical purposes; diagnostic reagents and preparations for medical purposes; diagnostic substances for medical purposes; contrast media for medical imaging; diagnostic scanning agents for in vivo use; diagnostic imaging agents for magnetic' resonance imaging; radiopharmaceutical products for clinical, medical, scientific and research use; radiopharmaceutical sources and standards for use in nuclear medicine; radioactive pharmaceutical preparations and non-radioactive reagents for producing radiopharmaceuticals for in vivo diagnostic or therapeutic use; gases and gas mixtures for medical imaging.), 7 (Engines using alternative fuels, namely gas, coal, mine gas, biogas created during the fermentation of agricultural waste, sewage gas and industrial waste gas; apparatus, equipment and instruments for the generation of power, namely, electric generators and wind powered electricity generators; turbines; turbines for power generation; wind turbines for power generation; wind turbines in association with wind farms, turbine generating installations, namely, power generating installations; engines for the generation of electricity; and parts and fittings for all the aforesaid; solar-powered electricity generators; complete line of materials, appliances, machinery, components, parts, systems and plants for the generation, transformation, conversion, transmission, distribution, control and utilization of electricity; dynamo electric machines, induction devices, electric translating devices, electric regulating and controlling devices, electric lamps, electric measuring instruments, electric protective devices, switchboards, switchboard appliances, wiring devices, and supplies; electric motors of all kinds, steam and gas turbines and parts thereof, electric generators and their parts, aircraft engines, compressors; washing machines, dryers, dishwashers, garbage disposers and compactors; pumps, namely, centrifugal pumps, diaphragm pumps, bellows pumps and process and transfer pumps; fluid control devices, namely, valves, flow meters, pressure switches, sequence timers, regulators, levelers, ejectors, and electrical controls and switches; fluid separation cartridges and parts therefore, including semi-permeable membranes; filter cartridges for various industrial machines for filtration applications including the filtration of coating solutions for the manufacture of magnetic tape and the filtration of petrochemicals, portable water, beer in the brewing industry, and 0 ther specialty chemicals; machines for the feeding and application of chemicals for industrial use; axial and centrifugal compressors; reciprocating compressors; screw and vane compressors; rotary, vacuum, electric, submersible and centrifugal pumps; turbo expanders, namely, air and electric compressors; CNG refueling machines for land

vehicles and industrial equipment and accessories and parts for all the foregoing namely, pumps, valves, fuel filters, filter casings, distributor rotors, blades, bearings and mechanical seals; steam condensers; Boat engines; turbochargers for engines; fuel injectors.), 9 (LED refrigerator lights; LED lighting systems; LED traffic and rail signals; fuel pumps for service stations for fueling airplane engines; fuel distribution equipment, namely, metered fuel pumps, electrical fuel level gauges, control valves for regulating the flow of gases and fuel lines; automated fuel station management systems comprising computer operating software, metered fuel pumps, rate control panels, fuel lines and dispensing nozzles for fueling land and marine vehicles and marine vehicles and aircraft; gas meters; on-board and wayside signaling and communication systems, train inspection systems, cross warning systems, switch machines; GPS - based tracking and monitoring systems for the railroad and transit industries; electrical devices and electrical power distribution products, namely, capacitors, circuit breakers, circuit breaker load centers, circuit closers, circuit interrupters, commutators, contactors, current rectifiers, current limiters, electric contacts, electric collectors, electric conductors, electric connectors, electric controllers, electric inductors, electric power supplies, electricity distribution boards and boxes, electricity distribution consoles, electricity switchboards and switchboxes; computer software for, persons who troubleshoot and maintain programmable controllers, for analyzing blood vessels including cardiac vessels which also provides calculation functions with respect to blood vessels, for use with medical patient monitoring equipment, for receiving, processing, transmitting and displaying data, for use in developing personalized asset allocation programs; for use on-line which enables office equipment dealers to submit applications, manage portfolios and communicate with the company; for use in accessing mortgage and insurance information, for collecting data involving vital medical signs, for use in electrical power systems analyses and instructional manual sold as a unit therewith, for use by employees for financial institutions for determining financial investments for clients and in processing the sale of the identified investments, for obtaining information on the flood-hazard status of real property, for the development of graphical user interfaces and data visualization, in the calculation of mortgage payments, for regulating and managing vehicle fleet maintenance services for use in connection with accessing and utilizing commercial computer services, for use by customers to obtain lease portfolio information, for a radiology information system for use by radiologists and radiology department in the database management of employee and patient information for patient monitoring and archival purposes installed on and used in connection with pes and medical monitoring equipment for graphical user interface, for use in sending encrypted and compressed data mover paging carrier systems, providing access to websites where buyers and sellers can conduct business electronically, and for underground navigation namely for navigation of down hole probe assembly for oil drilling and drilling assemblies for routing underground utilities; electronic, nuclear, industrial and laboratory testing, measuring, computing and control instruments and apparatus, telephones; electrical goods, electrical power generation and distribution products and electrical voltage and overvoltage surge products, namely, arresters, busways; capacitors; lighting contactors; controllers and input/output devices; fuses; lighting controls; switch boxes, LEDs, namely, light emitting diodes, voltage regulators for electric power, voltage surge protectors, voltage surge suppressors, voltmeters, electrical circuit boards, relays and timers, solenoids and limit switches, full-voltage manual starters, reduced voltage starters, electrical switches and disconnects, circuit board terminal blocks and pumping panels, circuit breakers and disconnects, transformers, electrical lighting and power circuit boards, electrical wires, cables, cords, and conductors, electrical wiring and fixtures, lightning arrestors, electricity meters, power meters, grounding resistors, humidity and temperature sensors; building and wood sensors; industrial calibration sensors, push buttons, motor control centers, electrical resistance heating wires and electrical controllers therefore and voltage regulators in International; software and software programs for industrial, research, and medical use; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for bioinformatics systems; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems;

apparatus manufacturing oligonucleotides; apparatus for microarrays; laser based optical systems for digital imaging; microarray slides; laboratory glassware; vials and microvials; microtitre plates; computer software for hospital operating room management; computer software for critical care information management; industrial process control software; computer software programs and program manuals sold as a unit for use in factory management; graphical user interface based computer programs for controlling machines in industrial automation applications; software for creating graphics displays and editing dynamic data interfaces for realtime graphics applications for industrial and business applications; communications software for connecting computer network users; software for plastic injection molding; software for control, monitoring, simulation, communications, data logging and collection, and factory automation; software to integrate manufacturing machine operations, control processes, provide data for visualization, track problems and generate production reports; packaged software for use in the operation and programming of grinding machines in the manufacturing industry; industrial process control hardware, namely, computer monitors; laptop computers, ethernet cards and cables; computer networking hardware, memory cards; microchips; microprocessors; computer network hubs, switches and routers, computer accessories, display devices and terminals; computer whiteboards; system boards and processors; call control, operator interface, gage interfaces and data collectors; control and manufacturing applications, namely, statistical process control, data collection, distributed numerical control; manufacturing execution systems and document management; digital signal processing products and systems, namely industrial automation controls and programmable logic controllers; machine tools, namely, an adaptive control product in the nature of an external controller to optimize machine tool cutting performance of rough and semi-rough cuts; distributed and remote input/output hardware devices, input/output modules, interface modules, power supplies and mounting hardware; intrusion and burglar alarm systems; security devices, namely, programming logic computers, control panels, electronic intrusion detectors, electronic glassbreak sensors, electronic vibration sensors, magnetic contacts for use in security systems, electronic switch plates, electronic motion sensors for alarm systems, electronic motion sensitive switches, hardwire sirens, audio speakers, electronic-drivers, access control and alarm monitoring systems; fire, heat and smoke detecting and alarm units; computer card operated access control systems; card readers, card encoders, and encoded cards for use with card operated access control systems; video cameras; video object recognizers; video object trackers; video license plate readers; video alarm verifiers; video face recognizers; video vehicle recognizers; video traffic detectors; video access door controllers; video intrusion detectors; processing hardware and software that analyzes digital video images to automatically extract, record and report intelligence, and remote video monitoring systems for security and surveillance applications; central video monitors; video recorders; cameras; closed circuit video systems; closed circuit video system comprising one or more cameras, and a camera housing; short range, wireless, radio frequency transceivers; power line transceivers; communication control hardware for operating closed circuit camera; communication control hardware, namely keypad controllers, matrix switchers, multiplexers, digital video recorders, integrated pan-tilt-zoom domes, remote video controllers, receivers, electronic alarm, management controls and triggers, and video transmission devices sold separately or as part of a system for operating closed circuit cameras; personal digital assistant devices configured for use by real estate professionals; communications interface devices for use with personal digital assistant devices; fiber-optic transmission systems, namely, fiber optic transmitters, receivers and transceivers used in the transmission of video, audio, and data signals over optical fiber; electrical switches; electro mechanical locks; magnetic locks; electric keys; handheld electronic hardware for receiving, controlling, storing, manipulating, displaying and transmitting data and for operating electronic locks; electronic access cards and readers and encoders therefore; magnetic access cards and readers and encoders therefore; smart access cards and readers and encoders therefore; proximity cards and readers and encoders therefore; key fobs and readers and encoders therefore; bar code access cards and readers, encoders, card lamination apparatus; access keypads; radio frequency

tracking tags; tracking and control system comprising one or more radio frequency tags, transceivers, and sensors used to determine and monitor the location and movement of tangible assets, inventory and individuals; infrared sensors; computer hardware and software for facilities management and controlling facility access systems and components therefore, namely, control panels, access card readers, and equipment and systems for video imaging, video monitoring; digital hard drive recording, network transmission and remote access; networked digital video storage servers, access control and surveillance applications alarm monitoring and security; computer software and hardware for controlling and operating security and access system comprising locks, doors, access, and identification; devices and security enclosures in the nature of boxes for securing keys; surveillance equipment sold individually as components or together as a system comprising one or more surveillance cameras, covert cameras, close circuit television cameras, camera housings, camera mounts, camera lenses, video monitors, video recorders, digital recorders, video storage media, video switches, control panels, keypad controllers, joystick controllers, interface apparatus for alarms and access control equipment, transceivers, receivers, transmitters, signal processors, multiplexers, matrix switches, controllers, control panel housing, switch housing, transformers switches, splitters, coaxial cables, connectors, motion detectors, microphones and speakers; computer user interface software and control software for managing security, fire and access systems; electric locks; hand-held electronic computer and communication hardware for receiving, controlling, storing, manipulating, displaying and transmitting data for operating electronic locks; electronic key fobs, readers and encoders; magnetic data carriers; data processing software and computer hardware; power supplies, namely batteries, rectifiers/voltage/current regulators and transformers; control panels - namely, electronic apparatuses adapted to electrically monitor a pre-determined activity and activate a burglar alarm; siren speakers; and electronic siren drivers - namely, tone generators and amplifiers adapted to be used for sirens; computer software to control communication hardware for operating and controlling closed circuit cameras; switch units incorporating magnetically actuated reed switches for use in burglary and fire sensing alarm systems, in industrial position sensing apparatus, in revolution counters, in equipment cabinet safety interlock systems, in industrial position controlling apparatus, in electrical cables and in pump and valve controlling apparatus and home security alarm systems; electrical and electronic checking apparatus for screening individuals, baggage, and cargo for the presence of particular substances; electrical and electronic checking apparatus for screening individuals, baggage, and cargo for the presence of explosives and/or narcotics; apparatus for detecting presence of explosives and other contraband; water filtering units for domestic, commercial and industrial use; waste water purification units; water purifying units for potable water for domestic, commercial and industrial use; time or condition sensing apparatus for initiating and controlling regeneration or backwash cycles for water treatment equipment; control valves for water conditioning and water filtration equipment; fluid separation units, namely industrial fluid filters; recycling units, namely, fluid purification units; bioreactors for culturing cells; water treatment equipment, namely, filter cartridges; water treatment equipment for household use, namely, water softeners and water conditioners; media filters and depth filters for removing sediments, iron, sulfur, tastes and odors from water; reverse osmosis water purification; depth filter units and depth filter cartridges for liquid and air filtration for domestic, industrial, and commercial use; portable analytical instruments; namely, a probe with a microprocessor based data conversion logger for measurement of organic and inorganic chemicals in water; filters and filter housings for laboratory use; fluid separation apparatus for laboratory use; membrane filters for laboratory use; silt density measuring device; deionization units for laboratory use, filters and filter housings for laboratory use; fluid separation apparatus for laboratory use; membrane for laboratory use; fluid flow control devices, namely, pumps, valves, flow meters and regulators for laboratory use; ozone monitors; laboratory equipment, namely, porous microtiter plates for use in cell biology and other life science applications; disposable cartridge filters for industrial use; electronic water and process treatment controls, namely, apparatus for use in the treatment of commercial and industrial water systems, boiler water systems, cooling water systems,

and closed water systems, determine the proper treatment program, apply the desired treatment and monitor the effectiveness of the treatment; computer software for data management in the water treatment and paper field; electronic controllers used for processing information in the water treatment field; apparatus for use in industrial water systems to measure and control ph and conductivity; apparatus for feeding chemical to an industrial, commercial or municipal water system in measured amounts; electronic test apparatus for use in water treatment; laboratory testing equipment—namely, deposition and corrosion rate testers; mobile laboratory equipped with equipment and instrumentation to monitor and measure ph, conductivity, and chromate concentration of industrial and domestic waters, to conduct inorganic analysis of water and to conduct microbiological testing of water; electronic and electrochemical products, namely, fuel cells; apparatus for converting electronic radiation to electrical energy, namely photovoltaic solar modules, photovoltaic solar hybrid modules, electronic sensors for measuring solar radiation, solar cells,; apparatus for converting electronic radiation to electrical energy, namely photovoltaic solar modules, systems, components, and all associated balance of system components; software to optimize performance of boilers.), 10 (Test kits for clinical medical use including test tubes, test plates and indicator charts for evaluating test results; medical apparatus and accessories systems for the dispensing of measured unit doses of pharmaceutical preparations; vials; cannulas; syringes; injectors; cartridges; pre-filled vials containing medical diagnostic reagents; pre-filled cartridges containing chemical solutions for medical use; pre-filled cylinders containing gases and gas mixtures for medical use; infusion pumps for intravenous administration of fluids; needles for medical purposes; implantable radiation therapy devices consisting of encapsulated radioisotope brachytherapy sources; radiation therapy delivery system consisting of radioactive seeds and a bio-absorbable carrier assembly; cardiac output monitors; heat and moisture exchangers; bacteria filters; gas analyzers for medical purposes; anesthesia record keeping and data management systems and patient monitor systems, namely, gas monitors; pulse oximeters, multiparameter monitors, ECG monitors, invasive and non-invasive blood pressure monitors, neuromuscular transmission monitors, metabolic monitors and spirometers for anesthesia, intensive care and diagnostic applications; anesthesia machines and ventilators; intensive care and anesthesia accessories for single patient use, namely, gas sampling lines, airway adapters, breathing circuits, spirometry sensors and tubes, tubes, water traps, pulse oximetry sensors, non-invasive blood pressure cuffs, flushing sets, anesthesia masks, carbon dioxide absorbers, temperature probes and nebulizers; central nervous system monitors; gastrointestinal tonometers; gradient coils; namely, magnetic gradient coils used in magnetic resonance imaging; medical diagnostic devices, namely, bone densitometers; fetal monitoring apparatus, namely, fetal pulse and vital signs monitors; patient monitoring apparatus, namely, heart and vital signs monitors medical imaging systems, namely, ultrasounds, medical diagnostic imaging machines, imaging devices for screening and diagnostic applications for use in planning intervention and surgery, and parts thereof and attachments thereto; medical diagnostic apparatus for displaying diagnostic images; namely, spot film apparatus, x-ray image intensifiers, x-ray fluoroscopes, mobile x-ray units, radiographic film viewers, computerized tomography scanners, nuclear resonance scanners, ultra sound scanners, magnetic resonance scanners, positron emission tomography (pet) scanners; and parts thereof and attachments thereto including tables and pads.), 11 (Solar collectors, solar heat collection panels; solar light fixtures, namely, indoor and outdoor solar powered lighting units and fixtures; solar thermal installations, namely solar thermal modules; solar water heaters; domestic electric and gas cooking appliances, namely, cooking rings, gas and electric stoves; gas and electric ovens and cooktops; heat exchangers; chemical heavy wall reactors and nuclear reactors and accessories and component parts thereof, namely, heat pumps, steam valves and valves for regulating the flow of gases and liquids; installation, maintenance and repair services for compressors, pumps, namely, machines, turbo expanders, fuel pumps and fuel distribution equipment, CNG refueling equipment, gas turbines, steam turbines, air cooled heat-exchangers, steam condensers, heavy wall reactors and tubular reactors; drilling and pumping of oil and gas; drilling for crude oil; oil well casing, tubing and drill pipe installation; rental of oil and gas well drilling tools; electric lamps of all kinds

and their parts; electric lighting fixtures and their parts; electric refrigerators, freezers, air conditioning apparatus, electric ovens, ranges; microwave ovens for cooking; wall cooking ovens for domestic use; food warming drawers; convection ovens, electric and gas cook tops; electric and gas cooking ovens and ranges; ventilation hoods for stoves; and ventilating exhaust fans; water filters; water softening units; clothes dryers; electric fans, ceiling fans, flashlights; lamps and lights for vehicle; electric lights for Christmas trees; fluid separation units; fluid concentration units; fluid recycling units; polymeric membrane material for use in the separation of fluids; filter apparatus used for filtering solids from gases and liquids or filtering liquids from gases, and for filtering one immiscible liquid from another; spirallywound elements or cartridges contained within a tubular plastic sleeve for concentrating products and removing impurities in fluid treatment systems; water conditioning units for residential purposes; reverse osmosis modules and membranes therefore; water purification units and systems consisting of clarifiers, electro de ionization systems, condensate polishers, vacuum degasification units, ultra filtration units, ultraviolet sterilizers, ion exchangers, acid and caustic regeneration systems, reverse osmosis systems, forced draft decarbonator units, filters, chemical feed systems and bulk storage units, sold with automatic controls and instruments to monitor operating parameters of the units and systems electrochemical liquid purification units for use in the industrial, commercial and municipal sectors.), 12 (Electric motors and diesel engines for land vehicles; locomotives and hybrid locomotives), 19 (Roofing, not of metal, incorporating solar cells; thermoplastic building and construction materials, namely, molded or extruded thermoplastic materials used as wood metal, roofing, support or glass substitutes.), 35 (Inventory control services; consultation in the field of inventory control services; truck and automobile fleet management services, namely voyage reporting and invoicing via a global computer network; consultation in the field of truck and automobile fleet management services; business administration consulting services; operation and management of power plants of others; consultation in the field of operation and management of power plants, Business services, namely the administration of repair and services contracts; supply chain management and consulting services in the areas of chemical product and service sourcing and procurement, product inventory and supply management and cost containment; consulting, marketing, cost and pricing analysis relating to electrochemical liquid purification units for use in the industrial sector.), 36 (Asset based and private label financing services; financial analysis and consultation; credit card financial services; credit card services, namely, extension of credit to others; financial asset management for others; insurance and re-insurance services, namely, underwriting services for all types of insurance; equity investment services; insurance underwriting services in the field of bonds; financial guarantee assurance underwriting services;-personal loan financing; mortgage banking services; acquisition financing services; commercial financing services; commercial real estate agency services; mutual fund investment; private equity and debt investment; consultancy, advisory and information services relating to all the foregoing services, insurance brokerage services, credit agency services in the fields of consumer and commercial credit, credit card services, real estate loan financing services and banking and financial services.), 37 (Consulting in the field of building construction ; construction, installation, repair, replacement, overhaul and maintenance of power plants, engines, turbines, wind turbines, motors and apparatus, equipment and instrument for the generation of power and electricity and their component parts, filings and accessories; installation, maintenance and repair services for compressors and pumps, namely machines, turbo expanders, fuel pumps and fuel distribution equipment, CNG refueling equipment, gas turbines, steam turbines, air cooled heat exchangers, steam condensers, heavy wall reactors and tubular reactors; oil and gas pipeline maintenance and repair services; oil and gas pipeline maintenance and repair services;-oil well casing, tubing and drill pipe installation; rental of oil and gas well drilling tools; remote monitoring and diagnostic repair and maintenance services rendered in the repair and maintenance of aircraft engines, turbines, electrical equipment, medical equipment, locomotives including accessories and component parts of all the foregoing; construction equipment leasing; chemical cleaning services for glass-lined

reactor vessels used in the chemical and pharmaceutical processing industries; maintenance services for heat transfer systems and condensers; maintenance and repair services in the field of computerized cooling system equipment, services rendered in the repair and maintenance of machinery, instruments, electrical equipment and appliances.), 40 (Oil and gas well treatment services; wastewater treatment services, water treatment services, namely, desalination, purification, conditioning, identifying and controlling microbiological organisms, cleaning of ion exchange resins; membrane regeneration services; chemical control system services relating to the feeding of treatment chemicals to industrial water systems.), 42 (Services relating to wind and wind power, namely professional consulting services and engineering services; design for others in the field of wind power; industrial design services; design of power, wind power and electric power generating equipment and installations; engineering services, technical consultation and research services in the oil and gas industries; oil and gas exploration services; geophysical exploration for the oil and gas industries; analysis of oil and gas fields; oil and gas prospecting, namely, well logging and testing; oil and gas well testing; oil and gas pipeline inspection; remote monitoring and diagnostic services for compressors, pumps, turboexpanders, fuel pumps and fuel distribution equipment, CNG refueling equipment, gas turbines, steam turbines, air cooled heat exchangers, steam condensers, heavy wall reactors and tubular reactors; information technology solution services in the field of global railroad and transit industries; and computer equipment and medical system leasing; -research, consultation, and advisory services relating to engineering, design and development problems encountered by utility, industrial, and commercial companies, governments, and individuals; Computer programming services for others; computer software design and analysis services for others; computer consultation services; maintenance and updating of computer software and computer systems for others; installation of computer software; computer systems analysis and design services for others; consultancy services relating to chemical research; consultancy services relating to the discovery and evaluation of drugs and compounds having diagnostic properties; technical support services; consultancy services relating to methods for diagnosis using laser based optical systems; high through put screening assays for drug development services; customer synthesis, analytical and diagnostic services; biotechnological services; technical support services for factory automation software, namely, providing maintenance of computer software and providing periodic upgrades of software; custom design of security access systems; design and consulting services in connection with the configuration of systems used in applications supporting fiber optic technology; technical support services, namely troubleshooting of problems with computer hardware, video and electronic communication hardware, and software; technical consultation services for hardware and software used in connection with security and access systems; technical consultation services for surveillance cameras; custom design services for others in the fields of security systems, access systems, and tangible asset and inventory monitoring systems; laboratory and testing services for fluid separation and membrane testing; engineering and consulting services in the fields of water treatment, aqueous systems, cooling water systems, industrial boiler water systems, industrial water and process systems, industrial fuel processing system treatment; engineering services and technical support services related to the design and configuration of computer software and hardware systems to be used in the treatment of aqueous system, petroleum and petrochemical processing systems; providing information to others, over a global computer network, relating to industrial water purification systems; advisory services related to all the aforesaid.) and 44 (Consulting in the field of hospital construction; consultancy services relating to medical and diagnostic imaging; consultancy and advisory services relating to diagnostic, prophylactic and therapeutic properties of pharmaceuticals; medical information services; medical services, including comprehensive services in the medical field relating to improving and maintaining quality of patient care, diagnosis and treatment

throughout a hospital; consultancy services in the medical and healthcare fields.) **(526)**: None

4.13 Madrid**MARKS REGISTERED UNDER THE MADRID SYSTEM**

The following are the marks whose international registration has been notified to Kenya as a designated Contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol and whose prescribed period of twelve months and eighteen months respectively for refusal has expired. These marks are deemed to be registered in Kenya and any aggrieved person may only apply for rectification of the Register in accordance with rules 16(3) and (4) and 21(1) (a) and (2) of the Trade Marks (International Registration) Rules, 2003.
