1.2 Patent applications published

(21): 2008/ 000731 (22): 10/04/2008 (51) Int.Cl.8 B 60B 11/00, 11/10, 15/00 (54): AUTO ANTI-ROLL SOLUTIONS.

(71): BAGHA MOHAMED NAZIR, P.O. BOX 10072-00400, NAIROBI., Kenya (72): BAGHA MOHAMED NAZIR (74):.

(57) Automobile anti-roll solution (AAS) is provided in the form of a safety device comprising the use of an additional special wheel to be attached to each of the existing two front wheels of a motor vehicle to prevent the vehicle from overturning in the event of any front wheel tyre burst. The AAS wheel (1) has two major components; namely a specially shaped metal wheel rim (2) to accommodate a rubber tyre (3) of a size designed to be smaller and narrower than the target standard front wheel (4) with which it is intended to be used. When a vehicle is travelling, and if any of the standard front tyre bursts, the attached AAS wheel immediately takes over the functions of the conventional wheel, thus preventing the rim of the burst wheel from hitting the road surface thus helping the driver to remain in control and

save the vehicle from overturning. The complete AAS wheel is designed to keep it off the ground by approximately 30mm to save on wear and tear expenses of an extra wheel and also to facilitate full steering curve without touching the mudguard. A narrow rubber tyre (3) is used to avoid excessive protrusion outside the vehicle body frame.

(57) Ordinary water reservoirs exhibit no clear sanitary guarantees and are overwhelmingly susceptible to various, and potentially dangerous, impurities. What is more they do not boast any clear masterpiece as to be conveniently relied upon with regard to the ever-demanding water economy around the world.

The present invention of the hydro-gym and water reservoir utilizes a fiberglass shell cover round. The large mass of fiberglass ensures water is maintained in spick and span conditions at all times without essentially worrying about the risk of impurity access. The fiberglass lid further creates an explicit realization of this attribute with minimum effort at all times. More over the underwater jet provides a colossal atmosphere for massage relaxation within the context of swimming and the relaxation is further supplemented by the provision of underwater side lamps, which facilitates an all round, day and evening utilization. The additional water heating through the allowance of a solar panel annexure would further reinforce the economical attributes of this invention.
