(57) Abstract: The invention concerns a method of manufacturing steel drums on a production line. In the method, flat, unpainted steel sheets (10) are initially rolled to cylindrical forms. The free edges of the forms are then welded to one another to produce cylindrical bodies (18). Thereafter the cylindrical bodies are transported stepwise and with their axes upright, typically by means of a walking beam conveyor (22) through an external painting and internal treatment booth (23). In this booth each body is initially deposited at each of one or more roller spray stations (24) with the lower end of the body locating on a circular array of rollers (25) which stiffen the body and the rollers are rotated to cause the body to rotate while paint is sprayed onto its external surface. The externally painted bodies are then deposited at an internal coating station (32) at which the internal surface of the body is coated with an appropriate treatment. The externally painted and internally coated bodies are moved out of the booth and through a curing oven in which curing of the paint and internal coating takes place.

(54) Title: A method and system for production of liquid natural gas
(51) Int.Cl.:
(57) Abstract: A process and system for liquefying a hydrocarbon gas is provided. The hydrocarbon feed gas is pre-treated to remove sour species and water therefrom. The pre-treated feed gas is then passed to a refrigeration zone where it is cooled and expanded to produce a hydrocarbon liquid. A closed loop single mixed refrigerant provides most of the refrigeration to the refrigeration zone together with an auxiliary refrigeration system. The auxiliary refrigeration system and closed loop single mixed refrigerant are coupled in such a manner that waste heat generated by a gas turbine drive of the compressor in the closed loop single mixed refrigerant drives the auxiliary refrigeration system and the auxiliary refrigeration system cools the inlet air of the gas turbine. In this way, substantial improvements are made in the production capacity of the system.
