(57): One aspect of the invention discloses a method of authenticating an application. The method comprising performing, with a server application (408), bootstrapping procedures (412) between the server application (408) and a bootstrapping server function (400); deriving (420, 422) a shared key based on at least a key received from the bootstrapping server function server (400) during the bootstrapping procedures (412) and a network application function identifier; providing (414) an application (406) with a bootstrapping transaction identifier, the bootstrapping transaction identifier being received from the bootstrapping server function server (400) during the bootstrapping procedures (412); receiving a response

from the application (406); and authenticating (426) the application by validating the response with the shared key.

However, there are cases when the compositions are not always adequate to control unwanted plants to be controlled such as weeds, and thus there is demand for the emergence of a highly active herbicide composition. Accordingly, provided are: a herbicide composition which includes flazasulfuron or a salt thereof, and at least one herbicidal compound selected from the group consisting of imazapic, hexazinone, mesotrione, and salts thereof; and a weed-control method using said composition.

 (57) This invention discloses a developed maize meal product fortified with papaya seed powder. It has been tested for effectiveness as an alternative mass drug administration (MDA) strategy for the large-scale deworming of children. It is based on earlier findings that papaya seed powder given alone has antihelmintic effect (1). In the framework of a randomized controlled trial, the efficacy of the product against infestation of intestinal parasites (IP) in school children in rural Kenya was investigated. The impact was compared with conventional drugs for IPs (albendazole). The primary outcomes sought were decrease in parasite load, Body mass index (BMI) and hemoglobin levels. The results obtained imply that the product can be used as an alternative MDA strategy for the large-scale deworming of school children and confirms our earlier hypothesis of its efficacy.

(57) An alveolar panels partition wall, with many advantages.

Comparatively to masonry partition wall, it is light weight, cost effective, and can be prefabricated with all the advantages of prefabrication. Comparatively to wood stud wall, it is stronger, has no risk of deterioration by rot fungi or termites, has no risk of fire, better sound barrier, easier to prefabricate and to fix into position. Comparatively to metal stud wall, it is stronger, cost effective, better sound barrier, easier to prefabricate and to fix into position.

2.0 Industrial Designs

NOTICE is given that any person who has grounds of opposition to the Registration of any of the Industrial designs advertised herein may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form IP 36 (in duplicate) together with a fee of Ksh.5, 000/= (local opponent) or US\$ 250 (foreign opponent).

The period of lodging the notice of opposition may be extended by the Managing Director as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Managing Director to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after a reasonable notice has been given in writing to the applicant to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

Representations and samples of the designs advertised herein can be seen at the Patent Registry, Kenya Industrial Property Institute, Weights and Measures premises, Popo Road, off Mombasa Road, Nairobi.

 (54) Title: MAGNETISM LIGHTNING ARRESTER
 (57) This invention relates to magnetic lightning arrester and more particularly to a lightning protection system for use on general purpose to provide lightning protectors of a novel and improved design strictly in conformity with the true character of the phenomenon, more efficient in action, and far more dependable in safe-guarding life and property. The device is connected between each electrical conductor in a power and a communications system and the Earth or ground. They create a means to short circuit the surge in power, limiting the rise in voltage. Usually, lightning arresters are placed where the power and communication lines enter the building. It intercepts the cloud discharge which flows inform of lightning. The electrical characteristics of the different types of lightning flashes, and the resulting surges and fields from a strike, are complex.

(57) The invention is a system that determines displays and controls the level of any commodity stored in a storage tank. The first module is a non-contact ultrasonic sensor module which will be fixed at the top of the tank. This module will determine the amount of the commodity in the tank. It will then wirelessly send the value it has determined to the second module. The second module is the display and control module. It will be located at a location which is most convenient to the user e.g. office, kitchen etc. This module receives the amount of the commodity in the tank from the sensor module and displays the value on an LCD display. It will further serve to automatically control any pumping action required at tank levels specified by the user.

(57) The present invention discloses an irrigation manager comprising electric circuit, sensors, pipes and water tank or source. It is designed to assist in the management of irrigating the farm automatically when the farmer is busy elsewhere attending to other chores and errands. The invention is designed according to Fig.1-3below. It water the crops when the soil water content falls down to a level below that desired for the crop survival and health growth. The watering frequency can be adjusted to suit different crops being managed in the farm as per the demand. This system saves the farm owner cost in hiring the necessary labour for the same work as well as avoiding over watering the crops resulting to soggy soil which lead to diseases such as root rot and other fungi related disease. The crop yield is increased since the crop gets watered as necessary

The pump system is positioned beneath the road consisting two pump cylinders coupled via an oscillating system. The pump uses pistons system with head amalgamated on the road surface. As automobile passes over the piston heads pushes the piston downwards interchangeably forcing water to the orifice hence seesaw paradigm pumping. The automobile motion on the system make a replica energy with sustainability and eco-friendly eliminating fuel-powered

(54) MOBILE FACILITY UTILITY WITH WIRELESS AND MOBILE BANKING SERVICES

(57) The mobile facility utility model with wireless mobile banking services is a technology that seeks to transform lives by changing the normal orthodoxies of a business unit operating in a fixed position or location. This shall be achieved by integrating all components of a business unit together into a single, multi-functional, simple, secure, facility which allows incorporation of secure payment channels plus other benefits, all into one facility/utility model which is literally mobile in nature.

(54) SYSTEM AND PROCESS FOR PRODUCTION OF FUEL GASES AND ULTRAFINE CARBON FROM LOW POLYETHYLENE WASTES

(57) The present invention discloses a system for production of fuel gases and carbon from Polyethylene Films and Shopping Bags (PFSBs) wastes. The system comprises a thermochemical catalytic reaction comprising chimney with a cap (1), reaction chamber (12), an in - feed section (4) control valve and furnace cover reactor (10) between 150-250 degree celcius, PFSBs are converted to combustible gases weighing 88-90 wt.% and carbon weighing 10-12 wt.% with Manganese Dioxide (MnO₂) catalyst. The system reaction chamber (12) is a conical shape fixed bed as shown in figure 1 below. The invention further discloses a process for producing combustible gases involving steps of thermal decomposition of NaHCO₃ at temperatures 100-250 degrees to generate carbon dioxide gas which drives off oxygen. The process reduces reaction time by 10-12 % and energy consumption by 45-60%, and recovers Carbon from the reaction after reaction.

(51) 2016.01:A 01N 65/00

(57) The present invention discloses a process of synthesizing chitosan-silica nano-composite biological control agent and process for control of bacterial wilt (*Ralstonia solanacearum*) in Tomato. The inventions concerns synthesis of Chitin (1) to Chitosan- nanoparticles (2) and then Chitosan-Silica nanocomposite (3) which in turn is synthesized to Bio-nanocomposite (4) as shown in Fig. 1 below. The said Chitosan immobilized silica nanocomposites are used to deliver biological control agents comprising *R. solanacearum* Bacteriophage in controlling *R. solanacearum* in tomato. The invention discloses a process of adsorption of biological control agents on the nanocomposites carriers enhances germination and growth vigour of tomato plants. Also disclosed is a method for reducing damage to tomato plants caused by *Ralstonia solanacearum* consisting of applying a composition of a chitosan-silica nanocomposites (3) in concentration of at least 0.5%, wherein tomatoes are planted within 20 days of the application of the nanocomposites to the soil.

(54) DIGITAL FINANCIAL GUARANTOR PROCESSING SYSTEM

(51) 2016.01: G 06Q 40/00

(57) This invention includes systems, procedures and computer programs for creating Digital Financial Guarantor Processing System to both financial institutions and members. The system will hugely improve efficiency in the financial services industry especially Savings and Credit organizations (SACCOS) and the financial services industry at large. The present system does not provide anything digital but rather a cumbersome form circulation and signing exercise that may take between a week to a year getting persons from different geographical locations before completing the process. The Digital Financial Guarantor Processing system will provide a digital solution by ensuring that an applicant will be able to digitally request for guarantors approvals electronically while the guarantors will have the free will to either accept or reject the applicant's request electronically. The confidentiality scope will be managed fully with each member having the liberty to elect how much they would be comfortable to guarantee.

(54) SMART SOIL SAMPLER

(51) 2016.01.01: G 01N 1/00, 1/28

(57) The present invention describes a smart soil sampler comprising moisture sensor (1), digital temperature sensor (2), Dfrobot PH meter (3), liquid crystal display (4), thin film transistor (TFT) display (9), programmed microcontroller (5), keypad (8), Arduino memory card (7), GSM SIM 800 (6), mobile phone (10), universal database (11), etched circuit board (14), temperature moisture container (13), pH container (12) and support case device (15). The sampling kit is an automated real-time system adapted to sampling soil type, temperature, moisture and pH and give recommendation basing on the measured parameters. The moisture sensor (1) is connected to the etched circuit board (14) and coded to convert the sensed values. A calibrated program code is uploaded in microcontroller (5) and enables the indication of dry, logy, semi-dry and moist. The invention further discloses a method of sampling soil consisting of soil collection and preparation of soil solution.

(54) DISPOSABLE INNER HELMET CAP FOR COMMERCIAL USE

(57) The invention relates to a disposable inner helmet cap for commercial use for head gear. This gear comprises of the provision of inner cap lining for the helmet, the inner cap is treated with methyl spirit to make it sterile and killing of diseases germs. The canvas material used to make the cap is bio-degradable. The cap is non-reusable thus help to prevent infection from one user to the other. Motorcycles are commonly now used for commercial transport of passengers from place to place. The need for the new technology far much needed and waited. The industry is gaining momentum with increase with traffic jams. The new inner cap for commercial use has technological advancement with infection control, disposal comfort and safety. So this is a single solution for commercial use of helmets globally.

(54) AUTOMATIC IRRIGATION MANAGEMENT SYSTEM

(51) 2016.01: A 01G 25/00, 25/16

(57) The present invention discloses an irrigation manager comprising electric circuit, sensors, pipes and water tank or source. It is designed to assist in the management of irrigating the farm automatically when the farmer is busy elsewhere attending to other chores and errands. The invention is designed according to Fig.1-3below. It water the crops when the soil water content falls down to a level below that desired for the crop survival and health growth. The watering frequency can be adjusted to suit different crops being managed in the farm as per the demand. This system saves the farm owner cost in hiring the necessary labour for the same work as well as avoiding over watering the crops resulting to soggy soil which lead to diseases such as root rot and other fungi related disease. The crop yield is increased since the crop gets watered as necessary.

4.11 Madrid Applications accepted for registration

The following are the marks whose international registration has been notified to Kenya as a designated contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol. The prescribed period of twelve (12) months and eighteen months (18) respectively for refusal of the marks commences from the notification date indicated herein for each mark.

NOTICE is given that any person who has grounds of opposition to the registration of any of the marks may, in accordance with the provisions of rule 11(1) of the Trade Marks (International Registration) Rules 2003, file a notice of opposition within sixty (60) days from the date of this Journal on form TM. No. 6 (in duplicate) together with a fee of Ksh 5, 000/= (Kenyan residents) or US\$ 250 (non residents).

The period of filing the notice of opposition may be extended by the Registrar of Trade Marks as prescribed in the Trade Mark Rules. Any request for such extension should be made to the Registrar before the expiry of the sixty (60) day statutory period.

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin

3. Patent Cooperation Treaty

The Patent Cooperation Treaty (PCT) is an international patent protection treaty consisting of over 140 member states. PCT is administered by the World Intellectual Property Organization in Geneva Switzerland. PCT makes it possible for an applicant to seek patent protection for an invention simultaneously in any of the selected member states by filing one application. PCT is a filing system and does not grant patents on behalf of the member states. Applications must enter national phase in the selected member states. In the

national phase, the applicant is required to pay the prescribed national fees in the said member states. Further, in some member states, a foreign applicant is required to have a resident agent. The PCT fees as of 1st May 2011 are as follows:

Type of fee	Fee		Fee waivers
International filing fee	USD 1, 367 or CHF 1330		90% waiver for a natural person from Kenya
Search fees (only one search authority needs to be selected by applicant)	Austria	USD 2, 443	75% waiver for natural a person from Kenya
