(57) The invention relates to a fluid flow metering device that transmit volume metered to a remote location through a public GSM/GPRS Network. The device receives remote coded signalized instructions from a remote location, to "open" or "shut" a solenoid valve mounted inside the device that allows or restricts fluids to flow through, and following the opening of the Solenoid valve, the fluid flowing actuates a flow sensor that measure the volume that flow through, and displays the volume metered numerically on the devices' screen and through a simultaneously action transmits the meter reading via a sim card of a public GSM/GPRS network service provider inserted in the device, to a remote location and in real time. The device also collects statistical data of fluid usage which it transmits to the remote location via the public GSM/GPRS network service provider.

(54) METHOD AND PRODUCT FOR ANTIBIOTIC RESIDUES DETECTION IN RAW MILK

(57)

The present invention involves development of a product and a method for antibiotic residues detection in raw milk which has been derived from Hardy Diagnostic Beta-lactamase Test (HDBT), a reagent used to establish beta lactamase producing microorganisms. The ingredients in the reagent composition have been modified, made into ampoules and their applicability assessed in raw milk antibiotic residues detection. Presence of residues is indicated by colour differences observed between a negative and positive milk sample, fuchsia purple and peach/pink respectively. The present invention in form of ampoules provides dairy industry with a solution in identifying raw milk suspected to have antibiotic residues during grading and acceptance. The procedure involves using one ampoules on 6mls of milk with complete shaking before making observations.

11.4 Removals

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

- (a) Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;
- (b) Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.

The Nice Classification is established under the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks, one of the treaties administered by the World Intellectual Property Organization. The Nice Classification was established by an Agreement concluded at a Diplomatic Conference held in Nice on 15th June 1957. Kenya has not ratified the Agreement. However, section 6 of the Trade Marks Act provides that goods and services in respect of which registration of a mark is applied for shall be classified in accordance with the Nice Classification.
