(54) Title: PROCESS, METHOD AND SYSTEM OF AERIAL PIPING AND DISTRIBUTION OF WATER

(72) Inventors: ODEDE, KENNEDY and ODHIAMBO, MICHAEL

(73) Applicant(s): SHINING HOPE FOR COMMUNITIES (SHOFCO), P. O. BOX 8303-00200 NAIROBI, Kenya

(74) Agent: AMISI, JOSEPH LEHMANN, LEHMANN ASSOCIATES, P. O. BOX 58021-00200 NAIROBI, KENYA

(57) A process, method and system of aerial piping and distribution of water. Water is obtained from a source and powered coercively through a pipe to an elevated water tank situated atop an appropriate steel or concrete support column. Water is then released from the elevated tank at pressure into high-density polyethylene pipes maintained in static position and calculated curvature by suspension cables or stiffening girders and roller bearings controlling flow across the required distance while increasing flow speed and flow pressure along a general downwards inclination within the context of high- to-low ground topography. Water is directed to flow onward to yet another steel or concrete support column or downwards to a terminal storage or supply point as desired and the entire system maintains an integrity monitoring and alarm mechanism by way of an ultra-thin electric or fiber-optic cable carrying a minute current in a closed circuit.

(73) Applicant(s): SIMIYU MARY TAABU, P. O. BOX 50199-00100 NAIROBI, Kenya

(74) Agent:

(57) The diatomaceous earth waste ceramic water filter is housed in a calabash or a ceramic or a plastic cylinder or any locally available material. The diatomaceous earth waste has not been used in producing ceramic water filters even though they are made up of 90.0% diatomaceous earth which is an excellent material in water filtration. Diatomaceous earth waste is capable of removing more than 99.9% micro-organisms and 98.8% virus. Furthermore, diatomaceous earth waste filter has disinfection abilities to decontaminate itself due to diatom like spears and does not require the silver nanoparticles. The brittle nature of ceramics has been addressed in the filter using an organic binder from *Corchorus olitoris*, locally known as "Mrenda" with the ratio of powder to binder being 3: 1. The filter uses the force of gravity to facilitate filtration processes aided by a straw to access the safe water which further increases the pressure gradient.

(54) Title: PORTABLE SOLAR WATER HEATING AND CIRCULATION INTEGRATED APPARATUS

(72) Inventors: GITHINJI, DAVID NJUGUNA, P. O. BOX 124-00507, NAIROBI, Kenya

(73) Applicant(s): GITHINJI, DAVID NJUGUNA, P. O. BOX 124-00507, NAIROBI, Kenya

(74) Agent:

(57) A portable solar water heating and circulation apparatus integrates water storage, heating and circulation units for ease of installation, scalability and portability. The water heating capacity of the apparatus can be scaled downward or upward depending on the user's hot water needs by changing its storage tank. capacity. The apparatus designs promote natural and assisted conventional heat flow thus ensuring homogeneous heating of water using solar radiation. The apparatus uses innovative mechanism which ensures circulation of water through the storage tank only occurs when solar heating is active. The apparatus consist of a storage tank enclosed in a transparent plastic cylinder creating a double walled structure filled with insulating materials. The water heating is achieved by use of thermic fluid pumped through metallic coils assembled inside and outside the storage tank. Another variant of the apparatus is also presented where water is pumped in and out of the storage tank. directly during heating process to achieve fast and homogeneous heating. The apparatus is generally used for heating water for domestic uses and is portable with little installation requirements.

(54) Title: Bicycle Helmet Structure

(51) Int.Cl.2016.01: A 42B 3/00

(57) Abstract:

The present invention discloses a novel bicycle helmet structure as a piece of personal protective equipment for bicyclists. The said helmet is designed to protect the head and face of an individual and offers head protection and shock absorption in order to reduce the chances of a concussion or head injury. The invention is meant to be placed around the head of the user and held in place using tightening buckles [1], [2], and webbing [4]. The said structure includes an exterior shell [5], a foam body [7] composed of a specific foam and straps [3]. Attached to the outer shell of the helmet are the hinge mechanisms [6] and when a downwards force is applied to the top of the hinge, it lowers and by doing so moves interior joints [18] apart thus applying tension on to the fiber [17] which turns the kinetic energy into elastic potential energy.

(51) Int.Cl.2016.01: C 08L 71/00, C 08L 23/00

(57) Abstract: The invention relates to a regenerated polypropylene waste fittings and a preparation method thereof. The invention solves the problem of high production cost since the existing special materials for polypropylene waste fittings are prepared from new materials and that the process comprises of the following steps:- Mixing a specific grade of Polypropylene, Cacao3 PP grade, Additives like UV Stabilizers, TiO2 and Master batches in a mixing machine for a specific period to make them homogenous, then mixed material is being poured into the hopper of high speed injection mould machine. The material inside the mould is being cooled by chilled water for a period of 20 seconds to 120 seconds and then after completion of cycle time the final waste fittings are ready to pack and that the final product takes its shapes as per the mould designs.

(54) Title: PACKAGE COMPRISING FEEDING MATERIALS FOR CUT FLOWERS.

(51) Int.Cl.2016.01: B 65D 81/00

(57) Abstract: The invention relates to a sachet, in particular a sachet assembly, comprising a closed bag (2) which is formed from water-permeable filter paper, and a solid substance (3) which is contained in the bag and is at least partially water-soluble. The water-soluble solid substance comprises a preparation for cut flowers. In particular, the preparation comprises a foodstuff and/or conditioning agent and/or disinfectant and/or biocide and/or growth inhibitor. The invention also relates to a packaging assembly comprising a waterproof, or at least moisture-proof, outer packaging containing a large number of sachets according to the invention. The invention also relates to the use of a sachet made from water-permeable filter paper for administering a preparation to cut flowers which are standing in water.

(54) Title: THREADED CONNECTION HAVING HIGH GALLING RESISTANCE AND METHOD OF MAKING SAME

(51) Int.Cl.2016.01: E 21B 17/042

(57) Abstract: A process for treating a pin having an external threaded portion and a box having an internal threaded portion wherein the process provides a threadable joint having a high galling resistance. One embodiment of the present invention includes applying a lubricant on the threaded portion of at least one of the pin and box. The threadable joint is made up by threadably engaging the threaded portions of the pin and box to a recommended torque according to the American Petroleum Institute and then breaking out the threaded joint. The making up and breaking out step with lubricant applied on the threaded portion of at least one of the pin and box is performed a plurality of times. One of the threaded portions of the pin and box is then case hardened. The threadable joint made from this process is highly resistant to galling without the requirement of any lubricant.

(51) Int.Cl.2016.01: B 65D 81/34, B 65D 81/38, B 65D 81/36

(57) Abstract: Devices, systems, and methods relating to providing a portable, rechargeable vessel for collecting, storing, and recovering thermal energy are provided. In one aspect, vessel includes a structure

defining a well and an open-top portion at the top of the well; a phase- change material, wherein the phase-change material is disposed in the well, the phase-change material being configured to change phase at temperature in the range of 110-700 Å°C; one or more thermally-conductive fins interleaved in the phase-change material; and a thermally- conductive heat transfer plate disposed at and substantially covering the open-top portion of the structure, in direct thermal contact with the one or more fins, thereby allowing the transfer plate to directly exchange thermal energy with the phase change material.

(57) Abstract: The present invention provides an icon display method and an icon display device for an intelligent terminal, wherein icon display method for an intelligent terminal comprises the following steps: creating at least one layer within a display interface of the intelligent terminal, wherein each of the layers has a display range identical to that of the display interface, and displays contents independently of each other; displaying an icon customizable in display region size at any coordinate position of each layer; when the intelligent terminal receives a touch action, judging whether the position of the touch action falls within an overlapping area of the display regions of at least two icons; and if the position of the touch action falls within an overlapping area of the display regions of at least two icons, activating the icon located in the uppermost layer of the overlapping area. The aforementioned method allows the display of the icons on the display interface not to be limited by the display regions and the number of the icons; and

it supports a user to customize the size and the display position of an individual icon depending upon the demand thereof in daily use.

(57) Abstract: The invention relates to medicine and concerns the treatment of diseases related to the aberrant activity of fractalkine and monocyte chemoattractant proteins 1-4 (CCL2, CCL7, CCL8, CCL13), preferably the treatment of pain, fever, pneumonia, bronchitis, bronchiolitis, alveolitis, rheumatoid arthritis, psoriasis and other diseases, using the compound 1-(2-(1H-imidazol-4-yl)ethyl)piperidine-2,6-dione of formula (I) or a pharmaceutically acceptable salt or solvate thereof. The present invention also relates to pharmaceutical compositions that contain a therapeutically effective amount of the claimed compound. The present compound and pharmaceutically acceptable salts thereof are highly effective in inhibiting the activity of the glutaminyl cyclase enzyme, which is involved in particular in processes of post-translational modification of the above-mentioned cytokines.

The chlorophyllin composition and its method of administration is also for concurrent increase in blood hemoglobin level. The Chlorophyllin is selected from the group consisting of sodium copper chlorophyllin, Potassium copper chlorophyllin, Potassium Iron chlorophyllin and other metal containing chlorophyllin/s. To the chlorophyllin composition are added additives, optionally, (a) a diluent, excipient or a carrier, and optionally (b) the chlorophyllin composition is administered, either concurrently, sequentially or in any other order, with other ingredients/compositions supportive for kidney function. The dosage form of composition comprises a liquid, powder, tablet and a capsule. A kit is also provided comprising the chlorophyllin composition and the additional ingredients. The other ingredients comprise amino acids taken individually or as a mixture, protein hydrolysate, proteins or protein concentrates, vitamins and minerals.

The invention particularly provides a multivalent combination vaccine comprising of i) significantly dose reduced Salk IPV or Sabin IPV (IPV) antigens prepared by utilizing improved methods of formaldehyde inactivation and alum hydroxide adsorption resulting in maximum recovery of D-antigen and ii) Injectable heat inactivated Rotavirus antigen(s) obtained from Rotavirus (CDC-9) strains that provides a broad cross-protective immunity among human rotavirus strains, iii) Hib PRP -carrier protein conjugate having improved stability and immunogenicity wherein said Hib PRP -carrier protein conjugate is initially prepared by using novel conjugation process and subsequently blended at low temperature in presence of a stabilizer for minimizing free PRP release iv) whole cell pertussis antigen with improved immunogenicity and stability obtained by addition of whole cell pertussis antigen at a later stage in a blend thereby minimizing hydrolysis based degradation v) Homogenous fractions of Diphtheria toxoid and Tetanus toxoid obtained by removal of undesirable aggregates by using Gel Permeation chromatography. The process of making such stable and immunogenic vaccine compositions by i) individually adsorbing dose reduced IPV. IPV antigens on alum hydroxide and keeping other antigen(s) unadsorbed or adsorbed on Alum Phosphate,

Alum hydroxide, on a combination of Alum hydroxide and Alum phosphate and ii) using a particular order of addition of antigens during blending is also disclosed.

(54) Title: ENZYME-ASSISTED LIPID-BASED EXTRACTION AND STABILIZATION OF PHYTO-CANNABINOIDS AND TERPENS AND PRODUCTS OBTAINED THEREOF

(51) Int.Cl.2016.01: C 12P 7/22, C 12P 17/06

(57) Abstract: The present application provides a safe, efficient, environmental friendly and convenient method for an enzyme assisted lipid-based extraction and stabilization of phyto-cannabinoids and terpenes/terpenoids from plant materials. The lipid-based extract presents high cannabinoid content and enhanced phyto-cannabinoids and terpenes/terpenoids stability, and it can be valorized toward multiple applications in the health, cosmetic, food and agricultural sectors.

(54) Title: TAMPER EVIDENT CLOSURE

(51) Int.Cl.2016.01: B 65D 41/34, B 65D 41/48, B 65D 41/47

(57) Abstract: Tamper evident closure (100) for a liquid container having a neck (2) with an opening defining a pourer orifice (3), said tamper evident closure extending in an axial direction (X-X) and comprising: a tubular member (101) comprising an upper portion (102) and a lower portion (103) with a lower edge (113) surrounding an open bottom end (101a); and a plug member (123) coupled with said tubular member, configured to selectively close and open the pourer orifice of the liquid container. The lower end portion (103) of said tubular member comprises axial constraining means (110) configured to engage with corresponding axial constraining means of the container (5) in order to constrain said lower portion of the tubular member to the container in the axial direction (X-X) and thereby prevent its removal therefrom. Said lower portion (103) of said tubular member (101) also comprises at least one recess (115) positioned between said lower edge (113) and said axial constraining means (110), the recess including at least a portion with a reduced wall thickness (S2) whereby an axial thrust exceeding a predetermined value applied against said lower edge (113) in the direction of the upper portion (102) of said tubular member (101) will result in a visible deformation of the lower portion (103) at the recess (115).

 (54) Title: DEVICE AND METHOD OF READING A MARK PRINTED ON CONTAINERS MOVING ALONG A CONVEYOR
 (51) Int.Cl.2016.01: G 06K 7/10, B 65B 35/58
 (57) Abstract: Device and method of reading a mark printed on containers moving along a conveyor (102), wherein the mark (112) is printed on a lateral portion (114) of the container (110). The device (100) comprises a drive unit for applying torque on a container (110) in a reading area (104) to generate rotation along its vertical axis (118), and a camera (120) for reading the mark (112) while the container (110) is spinning. The drive unit (130) comprises a motor (134) and a spinner (132) disposed at a first zone (106) of the reading area (104) for applying torque on a lateral wall of the container (110). The device (100) comprises a pushing assembly, e.g. an air knife (140) applying high-pressure air flow (142) that drives the container (110) towards the first zone (106) to ensure rotational movement of the container (110). The device allows safe capture of the mark (112) at high line feeding speeds.

 (54) Title: PANEL TRANSPORT CRADLE
 (51) Int.Cl.2016.01: B 65D 85/48, B 65D 19/44
 (57) Abstract: The invention provides a cradle (10) for shipping panels (12) such as solar panels. The cradle includes a frame (14) having a rectangular base (16) configured to be handled by a forklift and four pillars (20) extending upward from the respective corners of the base. The cradle further includes a first panel movement damping means in the form of a set of elongate stacking and spacer guides (22) of resiliently deformable material to prevent relative movement of the panels and to absorb panel vibrations, and a second movement or shock damping means in the form of movement or shock damping mounting means (24) for mounting each elongate stacking and spacer guides to the frame.

 (54) Title: SECURITY BAGS
 (51) Int.Cl.2016.01: B 65D 77/18, B 65D 33/34
 (57) Abstract: The invention relates to security bags and in particular, to a tamper evident bag (10). The tamper evident bag includes a security bag (12) which has at least one opening (14) and is provided with a bag visual indicator (16a). The tamper evident bag (10) further includes a seal (18) for securely closing the at least one opening (14) of the security bag (12). The seal (18) is provided with a seal visual indicator (20) which is associated with the bag visual indicator (16a), such that unauthorized access to the security bag (12) is evident when the seal (18) has been tampered with. The invention extends to a tamper evident kit which includes a security bag (12) and a separate seal (18).

(57) Abstract: A method for decoding an encoded audio bit stream is disclosed. The method includes receiving the encoded audio bit stream and decoding the audio data to generate a decoded low band audio signal. The method further includes extracting high frequency reconstruction metadata and filtering the decoded low band audio signal with an analysis filter bank to generate a filtered low band audio signal. The method also includes extracting a flag indicating whether either spectral translation or harmonic transposition is to be performed on the audio data and regenerating a high band portion of the audio signal using the filtered low band audio signal and the high frequency reconstruction metadata in accordance with the flag.

(54) HYBRID MANNED CRAFT THAT MANOUEVERS UPWARDS AND IN ALL AXIS

(51)

(57)

The craft is a sequence of gears attached to a portable light-weight twin propeller system or a mini jet turbine system that accepts gear input from the pilot and converts it to sufficient force to spin the blades fast enough to generate sufficient lift. The craft will have a wheel base and a locking mechanism to prevent the device from rolling away. The gears will be able to be turned either by hand peddling motion and leg peddling motion. The propeller and turbine system will be made of light weight environmentally friendly material and it will also have capabilities to slowly glide to the ground if input energy is insufficient during flight. The device will have an emergency parachute system at the back that once deployed, the propeller and turbine automatically flip and points down to blow air into the canopy and increase lift of the parachute in case of emergency. There will be a manual system, an electric system, a hybrid system and an octane based system. Luxury brands, recreation models and custom models as well as military, police models, surveillance models and amphibious models will be available .

processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; silicon coated silica colloids; chemical products for use in biological and biochemical research; chemical products for in vitro use in research and in biochemistry; chemical products for use in gel filtration and in the separation of biomolecules; chemical substances for in vitro laboratory use; chemical products and substances, all for in vitro research and biotechnological purposes; none of the aforementioned goods for use in agriculture, horticulture and forestry; chemical products for use with medical science; chemical products for laboratory use for in vitro analysis and/or testing; chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in-vitro research, analysis and/or testing, biochemical research use; chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; chemical reagents and substances for analyses (other than for medical or veterinary purposes); chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; chemicals and chemical products for purification purposes; premade buffer concentrates for purification of proteins; chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; enzymes; chemicals and chemical reagents for protein and proteome analysis; biochemical and biological preparations for use in industry, science and research; radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; gases and gas mixtures for industrial, research and scientific purposes; chemical kits comprising a lysis buffer and an enzyme for use in the generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; chemical substances for use in performing analyses; preparations for diagnosis for scientific or research purposes; dyes for scientific or research purposes; fluorescent dyes for labelling nucleotides and proteins; fluorescent labels for nucleotides and proteins; chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a mixture; chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, peR or DNA products from a mixture using spin-column chromatography; sorbents, elution solvents and buffer solutions; chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; fluorescent reagents; scintillants; films and photosensitive materials, papers and plates; films for use in autoradiography, fluorography or light detection techniques; sensitised films and chemical preparations and reagents for use therewith; film emulsions, developers, fixers and sensitisers; fixing baths; radioactive and non-radioactive preparations for scientific or research purposes; chemical reagents, preparations and gels for use in electrophoresis; protein preparations; protein molecular weight markers for in vitro scientific and research use; non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; chemicals for chromatography media; chemical products for use in separation and purification; chemicals that facilitate the separation

of mixtures of organic or biological materials; chromatography chemicals; chemicals for scientific use, namely beads as microcarriers; chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; in particular scientific, medical, biological, laboratory and forensic chemicals, in the form of substances, fluids, solutions, applied to media or not and media and matrices, for collection, transport, archiving, and analysis of collected samples and specimens; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry; kits and reagents for analysis or diagnosis used for scientific purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S-transferase-tagged recombinant proteins; prepared microtitre plates containing chromatographic substances; chemicals, namely agarose for use in the purification of proteins for in vitro use; chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; chromatography chemicals and media; chromatography media for purification of monoclonal antibodies; high molecular chemical substances for research and industrial purposes, namely microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; laboratory reagents, namely proteins for binding and detecting antibodies and chromatography packings and chromatography columns for purifying biological molecules; laboratory reagents, namely, silica beads for scientific and research; nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; polymers being chemical compounds for industrial use in the purification of chemical Substances; process chromatography media for large scale purification of monoclonal antibodies; reagent kits for DNA and RNA sequencing for use in genomic research; reagents for use with quantitative cell pharmacology profiling instrument systems for scientific and research use; sample preparations of nucleic acids using silica-based membranes; scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; Serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory research; resins designed and used in biopharmaceutical manufacturing; process chromatography membranes used in biopharmaceutical manufacturing; genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology research for analytical or preparative purposes.), 5(Sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations; filter capsules for pharmaceutical and medical purposes; diagnostic preparations for medical purposes, diagnostic test kits for medical purposes; filters for the treatment, separation, or decontamination of gas, air or liquids for medical purposes; chemical reagents for medical purposes; bacterial and biological preparations and cultures for medical use; blood plasma separating filters; cellulose for pharmaceutical purposes; chemico-

pharmaceutical preparations; Chemical nucleation preparations for medical use; Chemical reagents and substances for analysis for medical and veterinary purposes, excluding clinical medical diagnostic products and services; Diagnostic agents, products and preparations for clinical or medical purposes; diagnostic agents, products and preparations for use in the amplification, analysis or labelling of nucleic acids; Pharmaceutical and veterinary preparations, medicines and substances; contrast media for medical imaging; diagnostic scanning agents for in vivo use; radio-pharmaceutical products; radioactive sources and standards for use in nuclear medicine; Chemicals, in the form of substances, fluids or solutions, applied to media, or not and media for medical and diagnostic purposes, including chemicals, media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; Nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; Medical and pharmaceutical chemicals in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; Assays for research purposes; Cell culture media, reagents and buffers used ex-vivo for the further manufacturing of cell and gene therapies; Nutrients for micro organisms, reagents for medical and veterinary purposes, serums; Chemical nucleation preparations for medical use, namely for maintaining cell viability following freezing and thawing; Chemically treated paper for collection, isolation, and storage of biological samples for diagnostic, clinical and medical use; Diagnostic preparations, namely, polystyrene microspheres for clinical or medical laboratory use; Nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; cell culture products; cell culture media and serum designed and used for the growth and expansion of cells.), 9(Chromatography columns; Storage containers, mainly metal, glass or high polymer materials for use in laboratories; chromatographic and electrophoretic devices for science and technical goals, as well as accessories, including racks, stands, fittings, tanks pressure; laboratory equipment; laboratory filters, namely filters surface, depth filters, strainers, including membranes and filters of hyperfiltration membranes in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; separation apparatus, namely filtering apparatus for science; laboratory, pilot plant and production equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold separately and in combination, for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, pilot plant and production equipment, namely, mixers, electronic controllers for use with mixers and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold separately and in

combination, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such laboratory apparatus and instruments, namely pre-filled plastic cassettes, trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers, and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; apparatuses of molecular biology, namely filter membranes and membranes of transfer, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for laboratory use; chromatography systems; apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; freezing apparatus for scientific research and laboratory purposes; modular biologics manufacturing system used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; pre-packed columns for use in purification; supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; thawing apparatus for scientific research and laboratory purposes; Laboratory equipment namely, chromatographic columns, gas, water and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; extraction thimbles, and programmable electronically controlled hot plate/stirrers; computer software for remotely monitoring, managing, controlling and securing

clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and scanners all used for qualitative and quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for radiology for the purpose of measuring, monitoring and surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; radiology apparatus and instruments for the reading and interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems for use in radiology; apparatus for manufacturing oligonucleotides; apparatus for microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; kit consisting primarily of pre-packed columns, chemicals, pre-made buffer concentrates, syringes and instructional manual for the purification of proteins for in vitro use; nucleic acid purification filters; laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, chromatography resin, microscope lens paper, vent filter, DNA columns for separation purposes, RNA columns for separation purposes, PCR reagents, gradient media; a unique noise reduction capture mode in the Image acquisition (control) software offered as a part of a charge coupled device (CCO) camera system that is used for capturing images of protein gels and western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants, concentrations, binding patterns and multi-component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer software for differential analysis in electrophoresis and other proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors;; disposable plastic bioreactors for cell culturing;

downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; electrical and scientific apparatus - namely automated DNA optical scanning equipment; electrical and scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for microscopy, imaging, and informatics in the field of clinical and diagnostic testing; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer controlled devices for adjusting laser frequency of tunable lasers; electromechanical valve actuators, namely, high precision electric computer controlled valves for use in high precision flow applications; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing. Precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; electrically operated combined cooling circulator and thermostatic bath for use in heating and cooling liquids; filters and microporous membranes, holders, housings and supports therefor, none being made of metal; units for filtration and separation purposes, and parts thereof; all for diagnostic, scientific or laboratory use; filters and separators for scientific and laboratory use sold with or without supports for scientific and laboratory use; filters and separators; holders, housings and supports, all for use with the aforesaid filters or separators; filtering units; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration and/or diafiltration of critical biological solutions; filters for use in laboratory equipment in the biopharmaceutical industry; for computer software for controlling chromatography processes and other liquid handling modules; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic

preservation; heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; hybridization transfer membranes for non-medical scientific and research use; kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, chemicals, premade buffer concentrates, disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; apparatus and instruments for protein purification purposes, namely, prepacked chromatography columns; laboratory and clinical equipment, namely disposable plastic syringe filters; laboratory and clinical equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; laboratory and research equipment consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; laboratory and sample preparation products, namely, filters, filter-barrels, vials, caps and vial stands; laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely hand held devices containing a card for the processing of buccal cells; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; laboratory equipment and accessories used in electrophoretic processes; laboratory equipment, namely, disposable column and buffers for small volume purification of monoclonal antibodies; laboratory filtration systems, consisting of filter cartridge, manifold, pump, back pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument; liquid chromatography apparatus and chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and chromatography systems for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits; and the parts thereof; liquid chromatography analyzers; liquid chromatography apparatus of scientific use; membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; microtiter plates having chemical chromatographic resin for small scale purification of tagged recombinant proteins; modular biologicals manufacturing system used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; nucleic acid and protein transfer and immobilization media, for laboratory use; namely supported or reinforced nitrocellulose microporous filters; nucleic acid and protein transfer media, particularly for laboratory and clinical use; plastic labware including cellulose esters, immunoassay and lateral flow membrane therefor; laboratory

equipment - namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; scientific, medical, biological, laboratory and forensic media, namely, supporting composite material in the form of media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; software and hardware for analyzing data and automating processes related to biomanufacturing equipment.) and 16(Phase separating paper; chromatography paper, polyethylene-backed absorbent paper, and filter paper; lens cleaning tissue paper; Bags and liners of plastic for use in holding biological material and related reagents; Laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and cannot be repurposed after initial use, namely, filter paper; Creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; Filter paper; Glass microfibre filter papers; Polyethylene-backed absorbent paper for use as a protective cover for laboratory work surfaces, as an absorbent liner for animal cages, as a liner for humidity chambers; Marketing, scientific and instructional material; Instruction manuals; printed matter relating to purification in life sciences.) 11.4 Removals

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

- (a) Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;
- (b) Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.

11.5(a) Madrid Applications accepted for registration

The following are the marks whose international registration has been notified to Kenya as a designated contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol. The prescribed period of twelve (12) months and eighteen months (18) respectively for refusal of the marks commences from the notification date indicated herein for each mark.

NOTICE is given that any person who has grounds of opposition to the registration of any of the marks may, in accordance with the provisions of rule 11(1) of the Trade Marks (International Registration) Rules 2003, file a notice of opposition within sixty (60) days from the date of this Journal on form TM. No. 6 (in duplicate) together with a fee of Ksh 5,000/= (Kenyan residents) or US\$ 250 (non residents).

The period of filing the notice of opposition may be extended by the Registrar of Trade Marks as prescribed in the Trade Mark Rules. Any request for such extension should be made to the Registrar before the expiry of the sixty (60) day statutory period.

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin

11.5(b) Madrid Applications deemed registered automatically

The following are marks whose international registration has been notified to Kenya as a designated contracting party by the International Bureau. However, the prescribed period of twelve (12) or eighteen (18) months lapsed before the national processing was completed and subsequently were deemed registered automatically in accordance with Article 5(2) of the Madrid Agreement and the Protocol.

NOTICE is hereby given that any person aggrieved by the resultant automatic registration may, in accordance with the provisions of rule 21(2) of the Trade Marks (International Registration) Rules 2003, apply for rectification of the register under Rule 16(3).

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin
